

[PYCHARM webhelp] issue with page "using-todo.html" version "2020.3"

Moritz
Thursday at 15:27

Page address: https://www.jetbrains.com/help/pycharm/2020.3/using-todo.html?utm_source=product&utm_medium=link&utm_campaign=PC&utm_content=2020.3

Feedback message:

I was looking for information which files get searched for TODO comments.

I am working in a .puml file and have TODO comments in it. But they do not get listed. And I would like to see why.

(The same TODO lines appear again in the SVG export. And those TODO lines in the SVG file do get listed. So there must be some config problem with the files that get searched?)

Hello,

Have you tried to specify a custom pattern for .puml files under Settings/Preferences | Editor | TODO?

Please attach a screenshot showing the problem and your TODO settings.

Best regards,

Egor Klepikov,

Support Engineer at JetBrains

Hello,

We've checked the issue a bit more.

You're using <https://plugins.jetbrains.com/plugin/7017-plantuml-integration> plugin, right? It looks like the plugin cannot detect TODO comments correctly. Please contact the plugin vendor or raise a new issue at <https://github.com/esteinberg/plantuml4idea/issues>

Should you have any other questions, please don't hesitate ^[X]

Best regards,

Egor Klepikov,

Request #3181195
